

Advanced Power Management Sequence Controller

Model:PS0820

Features

- 8 Switch Channels: Independent control for up to 8 output channels.
- The device features 2 front-mounted pass-through power outlets, providing convenient and accessible power connections for additional equipment.
- Control Options: Supports TCP/IP, UDP, RS232, and front-panel push-button control.
- Cascading Support: Enables sequential control across multiple devices.
- Device ID Management: Unique ID assignment and detection for each device.
- Protection Mechanisms: Undervoltage and overvoltage detection with alarm functionality.
- 2.4-inch LCD Display: Intelligent front-panel display showing operational status.

Product Overview

Size:(WXDXH) 460 × 210 × 50 mm

Model:PS0820

Specification

Model Name	PS0820
Rated Output Voltage	AC 110~260V, 50Hz
Rated Output Current	30A (total)
Controlled Ports	8 channels (rear), 2 pass-through channels (front)
Power Supply	AC 110~260V, 50/60Hz, 30A
Per Channel Output Current	13A (max)
Weight	4.5Kg
Control method	TCP/IP, UDP, RS232, and front-panel push-button control
Dimensions	460 (W) x 210 (D) x 50 (H)

Packaging contents

- 1 X PS0820
- 1 x Power cord
- 1 X User manual
